

Call for Fast Abstracts
The 5th International Conference on Security of Information and Networks
(SIN 2012), October 22-26, 2012, Jaipur, India
www.sinconf.org

Fast abstracts/ Position Statement/ System Tool Demo and poster paper proposals are being invited for 5th ACM conference on Security in Information and Network 2012, being held from 22-26 October 2012 at Jaipur, India. A Fast Abstract is a short (upto two-page/four page) technical article that represents a work in progress that may not be accompanied by completed results yet represents a significant or novel idea. The goal is to promote current work, ongoing research, thoughts/opinions and/or new ideas to the research community. Authors are also encouraged to propose fast abstracts/position papers on practical studies and experiments, critiques of existing work, emerging issues, and novel ideas under development. Submissions must not substantially duplicate work that any of the authors has published elsewhere or has submitted simultaneously to any other conference or workshop that has published proceedings.

Topics of Interest: Possible topics for the special issue include:

- Access control and intrusion detection
- Autonomous and adaptive security
- Computational intelligence techniques in security
- Computer network defense
- Cryptographic techniques and key management
- Industrial applications of security
- Information assurance
- Next generation network architectures
- Network security and protocols
- Security in information systems
- Security tools and development platforms
- Security ontology, models, protocols & policies
- Standards, guidelines and certification
- Security-aware software engineering
- Trust and privacy
- Cyber Warfare (attacks and defenses)
- Malware analysis
- Security challenges in Mobile/Embedded Systems

Proposal submission: Submission should include the title, author's name(s), affiliation, mailing address, telephone, fax and email of the principal author. Acceptance and final category shall depend on their originality, significance, correctness, presentation and relevance. The submitted papers should be written according to double-column ACM conference format (<http://www.acm.org/sigs/publications/proceedings-templates>). All papers must be submitted electronically via the SIN 2012 Submission Site (<https://cmt.research.microsoft.com/SIN2012/>).

Submission categories:

- Position papers / fast abstracts - Authors are also encouraged to propose position papers / fast abstracts on practical studies and experiments, critiques of existing work, emerging issues, and novel ideas under development. Maximum length is 4 pages for fast abstracts and position statements.
- Tool demos - Enterprises and research centers developing, implementing, or using security tools and frameworks are encouraged to propose application / tool demos. Maximum length is 4 pages for tool demos.

Important Dates:

Paper Submission	July 30, 2012
Notification	August 10, 2012
Camera Ready	August 30, 2012

Organization Committee:

Conference Chairs	Program Chairs
Manoj Singh Gaur, Malaviya National Institute of Technology, India	Vijay Laxmi, Malaviya National Institute of Technology, India
Virendra Singh, Indian Institute of Technology, Bombay, India	Josef Pieprzyk, Macquarie University, Australia
Mehmet Orgun, Macquarie University, Australia	Ludmila Babenko, Southern Federal University
Atilla Elçi, Süleyman Demirel University, Turkey	Alexander Chefranov, Eastern Mediterranean Univ., North Cyprus
Oleg Makarevich, Southern Federal University, Russia	V. Kamakoti, Indian Institute of Technology, Madras, India

Organized by:

- Malaviya National Institute of Technology, Jaipur, India
- Indian Institute of Technology, Guwahati, India
- Indian Institute of Technology, Bombay, India
- The Centre for Advanced Computing - Algorithms and Cryptography (ACAC) & The Information and Networked Systems Security (INSS) & The Intelligent Systems Group (ISG), Dept. of Computing, Macquarie University, Sydney, Australia
- Department of Computer and Educational Technology, Faculty of Education, Süleyman Demirel University, Isparta, Turkey
- Department of Security of Information Technologies, South-Russian Regional Scientific-Educational Center for Information Security Problems, Southern Federal University, Taganrog, Rostov, Russia

Hosted By:

- Malaviya National Institute of Technology, Jaipur, India
